RENEW_PROTECT_STRENGTHEN

LEATHER

TECHNICAL DATA SHEET

Renewal, cleaning, maintenance and protection of the skin (natural and synthetic) and leather.

FEATURES

Mix without vaseline formulated to renew, maintain and protect as the best it's possible (with dry touch finish, hydro repellent with long-term effect), aesthetic characteristics of skin natural and synthetic, new and old, respecting the original color:

- renew the appearance (brightness and intensity) of the skin and the leather, with immediate effect;
- it respects the original tones color;
- does not contain vaseline/wax/silicone;
- protect and make water-repellent skin and leather for the longer time currently possible, preventing absorption of atmospheric agents, dirt, moisture and mildew;
- don't create visible thickness;
- nourishes the skin and leather and old buckets, and allows them to recover and retain their shape;
- easy application by brush, terminated with the passage of a cloth to remove the excess product;
- gloss finish with two applications;
- dry to touch finish, after absorption;
- cleans mostly hostile dirt from natural and synthetic skin.

FEATURES:

- WEATHER RESISTANCE: EXCELLENT
- ABRASION RESISTANCE: EXCELLENT
- RESISTANCE TO UV: EXCELLENT
- FLEXIBILITY: GOOD
- HEAT-RESISTANT
- PAINTABLE
- SURFACE APPEARANCE: COLOURLESS WITHOUT DETERMINING THICKNESS
- COLOR: YELLOW TRANSPARENT

SPECIFICATIONS

DRYING / CONSUMPTION: 20 ° at room temperature, dry to the touch in about 10/20 min. (Consequently the variable quality, characteristics and condition of the material, and temperature). Hydrocarbon mixture / solutes, for the renewal and protection of the skin (also synthetic) and leather respecting the tones of the original color, with average yield of 40 ml / m² (consequently the variable porosity characteristics, quality

and state of decay) . NOT CORROSIVE; DON' T CONTAINS VASELNE / SILICON.

STORAGE

The product must be stored in the original containers, away from direct heat sources, open flames, sunlight and children. Close the container after use. PRODUCT WITHOUT EXPIRY KEPT CLOSED.

DIRECTIONS FOR USE

CAUTION: Before applying the product on the skin, make a test on a hidden point to test color fastness, with a rag soaked in the product (if it' s not applied the protective, the color will be removed).

The product is ready for use. Do not dilute. Shake before using. Apply with a brush on dry skin and leather, at a temperature above 5 ° C. After application, wipe with a cloth, to achieve a natural and uniform application, and remove any excess.

To obtain a glossy finish to repeat the application after 24 hours. To clean very persistent dirt, apply with a brush for short stretches, leave for about a minute, and wipe with a microfiber cleaning cloth.

EQUIPMENT

Brush; cotton cloth; rough paper for workshop, microfiber cleaning cloth.

YIELD

22/28 m² / liter (variable as a result of the characteristics of porosity and state of degradation of the surface).

APPLICATION TEMPERATURE

+5°C +40°C

APPLICATION

- Prepare the dry material;
- Apply the product by brush, evenly over the surface;
- After a few minutes passing the treated surface with a soft cloth to remove any excess;
- Wait at least 24 hours before you start cleaning with strong detergents.

ALTERNATIVE:

- To clean and degrease the skin very dirty, apply to short sections with a brush, and after about twenty seconds pass with a clean micro-fiber cloth.
- To standardize color imperfections, apply with a cotton cloth soaked directly into the product to be used directly on the spots and standardize the different shades of color.

WARNINGS

To obtain the best possible result, you must follow the signs for surface preparation and the respect of optimum conditions. The technical information are approximate. It is recommended to adapt them to specific conditions of use.

The specification data and technical information have been calculated at + 15/30 ° C. In different conditions the data and the times suffer slight variations. Our recommendations on the use of the product are based on accurate observations and research carried out on their own. Were also taken into account the experience gained in the practical application. However, because of the variety of skins, their state of conservation and the application conditions, you can get slightly different results.
